EDUCATION

Georgia Institute of Technology

Atlanta, GA

Bachelor of Science in Computer Science | Major GPA: **3.65** | *Dean's List*

December 2026

Relevant Coursework: Algorithms, Machine Learning, Artificial Intelligence, Systems & Networks, Databases

EXPERIENCE

State Farm

June 2026 – Present

Software Engineer Intern

Atlanta, GA

- Eliminated payout-date inconsistencies across **5 Angular and C#/.NET implementations** and prevented incorrect severance calculations by centralizing business logic into one HR-validated source of truth
- Discovered and remediated **8 IDOR vulnerabilities** and secured **15+ unguarded admin endpoints** by enforcing authorization and server-side ownership validation in C#
- Modernized **2 enterprise applications** by migrating on-prem workloads to **AWS ROSA**, upgrading Angular 15 to 21, and replacing Windows/AD authentication with **MSAL and Microsoft Entra ID**
- Eliminated per-employee data entry by building job-status-driven fields for bulk employee updates, consolidating multi-record changes into a single administrative workflow

Tyler Technologies

May 2025 – Dec. 2025

Software Developer Intern

Lawrenceville, GA

- Modernized legacy AngularJS components to Angular across a municipal platform codebase, cutting application load times by **40%+** through lazy loading and optimized change detection
- Remediated **120+ accessibility violations** by implementing WCAG 2.2 standards across government-facing applications as part of an ADA compliance initiative
- Rebuilt a full-stack configuration workflow in Angular and C#/.NET, implementing REST endpoints and database operations while preserving production functionality

Georgia Tech Esports

Aug. 2024 – Present

Director of Innovation

Atlanta, GA

- Architected full-stack hackathon platform (React, Supabase) handling **200+** applicants with registration, project submission, and judging workflows
- Built GameFest competition platform for **500+** competitors with real-time bracket management and automated point distribution
- Led **10-person** developer team through code reviews, sprint planning, and CI/CD pipeline setup, onboarding **7+** new developers

PROJECTS

Drive Intelligence | *Next.js, TypeScript, Supabase, Google Drive API, Gemini API*

- Built AI-powered governance layer for Google Drive enabling natural language search, access risk detection, and naming convention enforcement, validated through **10+ user interviews**
- Engineered a semantic search pipeline using Gemini embeddings and Supabase vector storage, returning ranked results with contributor attribution in **under 2 seconds**
- Built context cards surfacing file purpose, key topics, and knowledge contacts, reducing the need to open documents during discovery

TapDetail | *Next.js, Node.js, Firebase, TailwindCSS*

- Launched a production scheduling SaaS with role-based dashboards and Twilio SMS notifications, processing **100+ bookings**
- Architected a multi-tenant Firestore schema with role-based security and built automated SMS reminders that reduced missed appointments by **25%**

TECHNICAL SKILLS

Languages: Python, C#, TypeScript, JavaScript, Java, C, C++, SQL, HTML/CSS

Frameworks: Angular, React, Next.js, Node.js, Express, .NET, Flask, Django, Tailwind CSS

Cloud/Tools: AWS, Google Cloud, Firebase, Supabase, PostgreSQL, MySQL, Docker, Git, GitHub Actions
